Contributors, v
Preface: Aspirations for a Successful New Series, xiii
By Philip H. Kass

Behavior
Separation-Related Problems in Dogs: A Critical Review, 1
Marta Amat, Susana Le Brech, Tomás Camps, and Xavier Manteca
Introduction, 1
What is known about separation-related problem risk factors?, 2
Causes of separation-related problems: more than hyperattachment, 3
Should treatment strategies be modified according to the current understanding of fear and stress?, 4
Disclosure, 6

Aggressive Behavior in Dogs: An Overview of Diagnosis and Treatment, 9
Barbara Schöning
Introduction, 9
Causations and triggers: factors influencing the development of an aggression problem, and eliciting individual aggressive actions, 10
Anamnestic history taking, practical evaluation, and diagnosis, 12
Treatment, 15
Management, 15
Social Interaction Between Dogs and Owners, 15
Special Training, 18
Psychoactive Medication, 21
Summary, 21
Disclosure, 21

Behavior and Medical Problems in Pet Animals, 25
Jaume Fatjó and Jonathan Bowen
Introduction, 25
Making an initial evaluation of health in behavior cases, 26
The interaction between medical and behavioral problems, 26
Examples of medical problems that influence behavior, 28
Pain, 28
Sickness Behavior, 28
Epilepsy, 29
Endocrine Disease, 29
The influence of traits, 30
The influence of the environment (physical and social), 31
Summary, 31
Disclosure, 32

Diagnostic Imaging
Whole-Body Computed Tomography Imaging in Cancer Staging, 35
Francesco Collivignarelli, Francesca Del Signore, Francesco Simeoni, Roberto Tamburro, Ilaria Falerno, and Massimo Vignoli
Introduction, 35
Whole-body computed tomography technique, 37
Whole-body computed tomography oncologic staging, 40
Thorax evaluation, 40
Lymph node evaluation, 40
Liver evaluation, 40
Spleen evaluation, 41
Muscular and cardiac evaluation, 42
Skeletal evaluation, 44
Present relevance and future considerations, 45
Summary, 45
CT Angiography and Vascular Anomalies, 49
Giovanna Bertolini

Introduction, 49
Technological and technical overview, 50
  Computed Tomography Technological
  Evolution, 50
  How to Review Computed Tomography
  Angiography Data, 50

Abdominal computed tomography angiography, 53
  Multiphase Computed Tomography
  Angiography Technique and Factors, 53
  Timing, 54
  Patient-Related Factors, 54
  Power Injector, 55
  Dynamic Contrast-Enhanced Computed
  Tomography, 55
  Dual-Source Computed Tomography, 56

Abdominal vascular diseases, 57
  Congenital Arterial Anomalies, 57
  Acquired Arterial Conditions, 59
  Congenital Anomalies of the Caudal Vena
  Cava, 60
  Acquired Vascular Conditions of the Caudal
  Vena, 62
  Congenital and Acquired Portal Venous
  System Anomalies, 62
  Congenital Portal Venous System Anomalies,
  62
  Portal Vein Thrombosis, 63
  High-Flow Versus Low-Flow Portal
  Anomalous Connections, 64
  Hepatic Arteriovenous Malformations, 64
  Congenital and Acquired Portosystemic
  Shunts, 65

Thoracic computed tomography angiography, 67
Thoracic vascular diseases, 67
  Aortic Arch Anomalies, 67
  Bronchoesophageal Artery Hypertrophy, 68
  Persistent Left Cranial Vena Cava, 70
  Esophageal Varices, 70

Pulmonary vascular diseases, 71
  Pulmonary Thromboembolism, 71

Lymph Node Evaluation with Diagnostic Imaging, 75
Elissa Randall

Introduction, 75
Survey radiography, 76
Contrast radiography and sentinel lymph node
detection, 76
Ultrasound, 77
Ultrasound and sentinel lymph node detection,
  81
Computed tomography, 81
Abnormal lymph nodes on computed
tomography, 82
Computed tomoraphic sentinel lymph node
identification, 83
Magnetic resonance imaging, 83
Magnetic resonance imaging sentinel lymph
node detection, 83
Nuclear medicine, 83
Positron emission tomography–computed
tomography, 84
Emerging lymph node imaging, 85
Summary, 88
Disclosure, 88

Gastroenterology

Genetics and Immunopathogenesis of
Chronic Inflammatory Enteropathies in Dogs, 91
Karin Allenspach and Jonathan P. Mochel

Introduction and definition of chronic
inflammatory enteropathies, 91
Etiopathogenesis of chronic inflammatory
enteropathies, 91
Genetic Predisposition in German Shepherd
Dog, 92
  The Role of Intestinal Microbiota in the
  Immunopathogenesis of Chronic
  Inflammatory Enteropathies, 92
Evidence of Innate Immunity Hyper-
Responsiveness in Chronic Inflammatory
Enteropathies, 93
The Role of the Adaptive Immune System in
Chronic Inflammatory Enteropathies, 93
Evidence of Intestinal Epithelial Damage in
Chronic Inflammatory Enteropathies, 94
Granulomatous colitis in dogs, 96

Introduction, 96
Pathobiology and Cause, 96
Clinical Presentation and Differential Diagnosis, 97
Treatment, 97

Summary, 98
Disclosure, 98

The Intestinal Microbiome in Canine Chronic Enteropathy and Implications for Extraintestinal Disorders, 101
Jan S. Suchodolski

Introduction—importance and function of the intestinal microbiome, 101
Assessment of the intestinal microbiome, 102
Alterations in the intestinal microbiome in intestinal disease, 103
Intestinal microbiome as metabolic organ and the impact on extraintestinal systems, 105
Short-Chain Fatty Acids, 105
Bile Acid Metabolism, 105
Tryptophan-Indole Metabolism, 106

Examples of extraintestinal disorders that are linked to gut dysbiosis, 106
Chronic Kidney Disease, 106
Gut-Brain Axis, 106

Disclosure, 107

Important and Novel Laboratory Parameters and Biomarkers for Canine Chronic Enteropathy, 111
Romy M. Heilmann

Introduction, 111
Laboratory parameters in dogs with chronic enteropathy, 112
Routine Clinical Pathology Parameters in Dogs with Chronic Enteropathy, 112
Biomarkers in chronic enteropathies of dogs, 115
Biomarkers that are currently available for clinical use in small animal medicine, 116
Food Antigen Testing, 116
Serum Cobalamin and Methylmalonic Acid Concentrations, 116
Serum Folate Concentration, 116
Fecal and Serum Alpha1-Proteinase Inhibitor, 116

Serum C-Reactive Protein, 117
Fecal Calprotectin, 117
Fecal Dysbiosis Index, 117

Biomarkers that are currently primarily a research tool in small animal gastroenterology, 117
Fecal IgA Concentration, 117
N-Methylhistamine, 118
Perinuclear Antineutrophilic Cytoplasmic Antibodies, 118
Fecal S100A12, 118
Intestinal Alkaline Phosphatase, 118
Soluble Receptor for Advanced Glycation End Products, 118
Serum and Fecal 3-bromotyrosine, 118
Cytokines and Chemokines, 118
Metabolome, 119
Cellular Biomarkers, 119
Genomic Biomarkers, 119
Other Functional Biomarkers, 119

Present relevance and future avenues to consider or to investigate, 120
Summary, 123
Disclosure, 123

Inflammatory Bowel Disease, Food-Responsive, Antibiotic-Responsive Diarrhoea, Protein Losing Enteropathy: Acronyms, Clinical Staging, and Treatment of Chronic Inflammatory Enteropathy in Dogs, 127
Fabio Procoli

Introduction, 127
Definition and Classification of Canine Chronic Inflammatory Enteropathy, 127
Insight into chronic inflammatory enteropathy acronyms, 128
Food-Responsive Enteropathy, 128
Antibiotic-Responsive Enteropathy, 128
Immunosuppressive-Responsive Enteropathies, 128
Protein-Losing Enteropathy, 128

Clinical staging of chronic inflammatory enteropathy: assessing disease activity and severity, 129
Background, 129
Signalment, 129
Infectious Disease

Enteric Viruses of Dogs, 143
Nicola Decaro
Introduction, 143
Canine parvovirus, 143
Virus and Host, 143

Disease, 144
Diagnosis, 146
Treatment, 147
Prophylaxis, 147
Canine coronavirus, 148
Virus and Host, 148
Disease, 148
Diagnosis, 150
Treatment and Prophylaxis, 150
Canine rotaviruses, 150
Virus and Host, 150
Disease, 151
Diagnosis, 151
Treatment and Prophylaxis, 152
Canine caliciviruses, 152
Viruses and Host, 152
Disease, 152
Diagnosis, 152
Treatment and Prophylaxis, 153
Canine astroviruses, 153
Virus and Host, 153
Disease, 154
Diagnosis, 154
Treatment and Prophylaxis, 154
Canine circovirus, 154
Virus and Host, 154
Disease, 154
Diagnosis, Treatment, and Prophylaxis, 154
Canine kobuvirus, 154
Virus and Host, 154
Disease, 154
Diagnosis, Treatment, and Prophylaxis, 155
Canine bocavirus 2, 155
Virus and Host, 155
Disease, 155
Diagnosis, Treatment, and Prophylaxis, 155
Other viruses, 155
Summary, 155
Funding sources, 156
Disclosure, 156

Advances in Molecular Diagnostics and Treatment of Feline Infectious Peritonitis, 161
Emi N. Barker and Séverine Tasker
Introduction, 161
Background, 161
Feline Infectious Peritonitis Risk Factors, 163
Diagnostic tests for feline coronavirus exposure or shedding, 168
Diagnosis of feline infectious peritonitis, 169
Clinical pathologic changes of feline infectious peritonitis, 171
Treatment, 178
Prognosis, 182
Present relevance and future avenues to consider or to investigate, 182
Summary, 183
Funding, 183
Disclosure, 183

Infectious Agents in Feline Chronic Kidney Disease: What Is the Evidence?, 189
Katrin Hartmann, Maria Grazia Pennisi, and Roswitha Dorsch
Introduction, 189
Significance, 190
Feline Retrovirus Infection, 190
Feline Infectious Peritonitis, 192
Paramyxovirus Infection, 193
Leptospirosis, 194
Lyme Borreliosis, 195
Leishmaniosis, 196
Heartworm disease, 196
Current relevance and future avenues to consider, 197
Summary, 199
Disclosure, 199

Nutrition
Nutrition for the Hospitalized Patient and the Importance of Nutritional Assessment in Critical Care, 207
Yuki Okada and Sean J. Delaney
Introduction, 207
Starvation, 208
Simple Starvation, 208
Stress Starvation, 208
Why feed: protein catabolism and survival, 208
Who’s at risk of starving or who to feed?, 208
How to feed: oral and enteral nutrition, 210
What to feed, 213
How much and how often should I feed?, 217
What to watch for: monitoring for complications, 219
How to feed: parenteral nutrition, 220
Summary and future directions, 223
Disclosure, 223

The Role of Taurine in Cardiac Health in Dogs and Cats, 227
Jennifer A. Larsen and Andrea J. Fascetti
Introduction, 227
Physiology and metabolism of taurine in dogs and cats, 228
Etiology and characterization of taurine deficiency, 228
Clinical taurine deficiency in dogs, 229
Reoccurrence of canine dilated cardiomyopathy cases, 231
Potential Risk Factors, 231
What Is the Role of Taurine?, 232
Assessment of the patient with dilated cardiomyopathy, 234
Corrective actions in pet food formulation, 235
Disclosure, 235

Combining Nutrition and Physical Rehabilitation to Improve Health Outcomes for Dogs and Cats, 239
Sarah K. Abood and Allison M. Wara
Introduction, 239
Tools and procedures for general practitioners, 240
Body condition scoring, 240
Muscle condition scoring, 240
Nutrition assessment, 240
Orthopedic and neurologic examinations, 241
Case: Canine Weight Loss, 242
Case: Feline Osteoarthritis, 249
Case: Canine Athlete, 257
Summary, 263
Disclosure, 263

Vitamin D in Health and Disease in Dogs and Cats, 265
Ronald Jan Corbee
Introduction, 265
Significance, 265
Vitamin D Metabolism, 265
CONTENTS

Vitamin D Requirements, 266
Vitamin D in Bone Metabolism, and Calcium and Phosphorus Homeostasis, 266
Associations Between Vitamin D Status and Diseases, 269

The Role of Supplementation, 271
Present relevance and future avenues to consider or to investigate, 272
Summary, 273
Disclosure, 273
